▲ The Mighty Niagara by Arthur Weaver. "I took this picture of the Niagara River while hiking in the Niagara Glen in early fall," he notes. "The Glen is located half way between Queenston and the Whirlpool. Approximately 10,500 years ago the progress of the Falls were stalled at the Glen for 5,500 years due to a reduction in glacial water flow."

► Deer Fawn by Wendy Jenkinson  
 "My three friends and I were very surprised and amazed to see this cute fawn sleeping in 'Heartland Forest' near the Escarpment in Niagara Falls," she explains.
